

Part 1 Liberal Arts Division Syllabus

Part 1 Liberal Arts Division Syllabus

1. Policies

This syllabus provides students with information about college and course policies as well as information regarding course content and assignments this semester. While the syllabus will be followed as closely as possible, the instructor reserves the right to modify, supplement, and make changes as course needs arise.

Students in this course are expected to be familiar with Wake Tech's policies and procedures as well as the course requirements set by the instructor.

1.1 College Catalog

Wake Tech's College Catalog is an information and reference guide on college policies, facilities, degree programs, services, personnel, and other topics.

Wake Tech's College Catalog: [College Catalog \(opens in a new window\)](https://www.waketech.edu/catalog), Direct link: <<https://www.waketech.edu/catalog>>

The College Catalog contains information about many topics, including student rights and responsibilities, registration, financial aid, academic information, degree programs, security of student records, etc.

In this part of the syllabus, some selected college policies are described.

1.2 Attendance Policy

To remain enrolled in online, hybrid, and blended courses, each student is required to open and take the Course Entry Quiz in Blackboard by 11:59 PM (EST) on the 10% date of the semester. Students are required to complete the Course Entry Quiz before they are permitted to access other course modules and assignments. Students who do not attempt the Course Entry Quiz by the deadline will be dropped from the course.

Additional expectations regarding your attendance in this class may be included in the department or instructor section of the course syllabus.

1.3 Coursework

- All course assignments and course deadlines follow Eastern Standard Time.
- If for any reason this class does not meet for all required minutes, class time will be made up via out-of-class assignment(s). Details will be clearly explained on Blackboard.

1.4 Appropriate Communication

In Liberal Arts Division classes, students are expected to be respectful and courteous in their communications. This includes all online or electronic communication, which should follow the standards of Internet etiquette (also known as "netiquette").

Revised August 2025

Please follow netiquette guidelines and be respectful and courteous in all course assignments and interactions with peers and course instructors. Please refrain from threats, ad hominem attacks, and/or disrespectful tactics. Any assignment submissions deemed inappropriate by the course instructor(s) will be deleted, and no credit will be awarded for the respective assignment. These netiquette practices apply to all technologies, assignments, and communication interactions in the course. Following established netiquette creates a positive, supportive learning environment that welcomes diversity of opinions and ideas.

Wake Tech is committed to creating a positive, supportive environment that welcomes a diversity of opinions and ideas for students. To ensure that we can have open discussions, please respect the confidentiality of what classmates are willing to share. At the same time, students should exercise good judgment in what they choose to share.

This class may utilize MS Teams in various capacities. The online MS Teams interactions between and among students and the instructor are subject to Wake Tech's Student Code of Conduct.

Students are expected to check emails regularly throughout the week for communications from instructors.

1.5 Academic Integrity Policy

Expectations: When college officials award course credits, they assume integrity on the part of the student who has completed the work. Wake Tech expects students to demonstrate the highest personal integrity in all academic work and behavior.

Cheating and plagiarism, as defined below, are forms of academic dishonesty that violate the integrity of the academic process.

A. Violations of the Academic Integrity Policy

1. Cheating, including:

- a. receiving, giving, or helping another student receive or give any information during a quiz, test, examination, or individual assignment;
- b. using unauthorized materials or equipment during a quiz, test, or examination, e.g., notes or books;
- c. communicating the subject matter or contents of a quiz, test, or examination to another student unless specifically authorized by the instructor to share it;
- d. taking a quiz, test, or examination for another student;
- e. obtaining quiz, test, or examination questions beforehand;
- f. tampering with the grading of a quiz, test, or examination; or
- g. working with others in completing take-home quizzes, tests, examinations, or individual assignments unless the instructor specifically authorizes collaborative work.

2. **Plagiarism***

Plagiarism is stealing, or passing off as one's own, the ideas or words of another person. When students present others' words or ideas in a written assignment, they must document the source(s), as described in the MLA Handbook or as directed by the instructor of the course. Plagiarism also includes:

- a. having another person write a paper and submitting it as one's own;
 - b. copying all or part of a paper from another student or another source, such as the internet; or
 - c. allowing another person to copy one's work.
 - d. viewing other posts on a post-first Discussion Board before posting your thread
3. Buying, selling, stealing, or soliciting any materials purported to be unreleased contents of a forthcoming examination, quiz, test, or project/assignment, or the use of such material.
 4. Substituting for another person in any of the above-mentioned situations or allowing another person to substitute for oneself.
 5. Collusion with another person in the preparation or editing of assignments submitted for credit unless such collaboration has been approved in advance by the instructor.
 6. Knowingly furnishing false information to the college; forgery, alteration, and/or use of college documents or instruments of identification with the intent to defraud.
 7. Using AI-generated content without the expressed consent of the instructor.

B. Academic Penalties

The following academic penalties may be imposed by an instructor, a department head, or a division dean for violation of the Academic Integrity Policy:

1. Loss of Grade Points
2. Loss of Grade: A zero for the assignment, quiz, or test.
3. Loss of Credit: An "F" for the course and loss of the right to attend remaining class sessions.

Documentation of all Academic Integrity Violations resulting in the Loss of Credit will be retained by a Student Conduct Officer.

*Please note that all work submitted must be **new, original work**. According to the 9th edition of the *MLA Handbook for Writers of Research Papers*, "If you reuse ideas or phrases that you used in prior work and do not cite the prior work, you have plagiarized. Many academic honesty policies prohibit the reuse of one's prior work, even with a citation" (8). Similar rules exist for documentation systems used in all fields of study. Whether researched or not, just as recycling work created by someone else in an effort to earn credit is plagiarism, re-using one's own work, without the permission of the course instructor, is "self-plagiarism" and is unacceptable because the work is not new or original.

SafeAssign: This course may require students to submit essays and/or papers using a Blackboard *Assignment* submission function. By utilizing this *Assignment* essay

submission function in this course, you acknowledge your understanding that this function checks essay/paper submissions for plagiarism using SafeAssign. Your papers may be submitted to institutional and Global Reference databases.

1.6. Miscellaneous

Wake Tech's Online Learning Technical Support

[Wake Tech's Blackboard Technical Support and Help Desk \(opens in a new window\)](#)

Direct link: <https://www.waketech.edu/online-learning/technical-support/blackboard>

HyFlex Classrooms

Classes scheduled in on-campus HyFlex classroom spaces may be recorded. With their enrollment in course sections taught in Hy/Flex classrooms, students acknowledge their permission for their in-class speech and activities to be recorded.

College Services

Information about the following college services, and other services, is available in the Blackboard course “Assist” folder: Wellness Services; Disability Support Services (DSS); Libraries; eLearning Testing Center; ITS Help Desk; Student Support; Tutoring and Learning Center; Care Center, and Academic Advising.

Part 2 Department-wide Syllabus

Course Description: Psychology 150—General Psychology

This course provides an overview of the scientific study of human behavior. Topics include history, methodology, biopsychology, sensation, perception, learning, motivation, cognition, abnormal behavior, personality theory, social psychology, and other relevant topics. Upon completion, students should be able to demonstrate a basic knowledge of the science of psychology. This course is computer-assisted; for assistance, contact [Wake Tech Help Desk \(opens in new window\)](https://my.waketech.edu/helpdesk.php) at <<https://my.waketech.edu/helpdesk.php>.

Textbooks

Some classes use Open Educational Resources. Please check with your instructor before purchasing the textbook. The free resource being used is:

Speilman, R.M., Jenkins, W.J. & Lovett, M.D. (2020). *Psychology, 2e*. Houston: OpenStax.
<https://openstax.org/books/psychology-2e/pages/1-introduction>

For classes being taught by the following faculty, the textbook is below: Dr. Eaton, Ms. Nelson, Ms. Arnette, Mr. Lora, Ms. Wynn, Mr. Zaslow

Weiten, W. (2022). *Psychology: Themes and Variations (11th ed.)*. Boston, MA: Cengage ISBN: 9798214351513R180

Prerequisite

Take 1 group Take ENG-090 RED-090 Take ENG-111 Take DRE-098 Take ENG-002 - Must be completed prior to taking this course.

Students who have not met the prerequisites may not remain registered for the course.

Credit Hours:

This course is the equivalent of 3 credit hours.

Student Learning Outcomes

By semester's end, students will be expected to demonstrate the ability to:

1. Discriminate among the major theoretical perspectives in psychology.
2. Demonstrate understanding of the strengths and limitations of the various research methods used in psychology.
3. Demonstrate understanding of the basic structure and functioning of the human nervous system, including the processes of sensation and perception.
4. Demonstrate understanding of the major theories of learning and motivation.
5. Demonstrate understanding of memory as a process of human cognition.
6. Distinguish among the major theories of personality.
7. Demonstrate knowledge of abnormal behavior and its causes.
8. Demonstrate knowledge of the influence of social variables on individual behavior.

General Education Assessment

Problem Solving

This course satisfies one portion of the Wake Technical Community College General Education

Revised August 2025

Outcome of Problem Solving.

Course Requirements

- Students will complete all readings prior to class and attend class regularly.
- Students will participate in class discussions and assignments.
- Students will complete at least one written assignment, if required.
- Students will take a cumulative final exam at the end of the semester, if required.

Attendance-Based Withdrawals

Attendance Policies for Degree Courses (<https://www.waketech.edu/catalog/academic-information#sec8945>)

In accordance with North Carolina Community College System and Southern Association of Colleges and School Commission on Colleges policies for awarding credit, Wake Technical Community College requires regular class attendance.

Regular class attendance also gives students the full benefit of instruction from their faculty, while absences hurt academic performance and are not a part of good scholarship. Accordingly, the purpose of this policy is to inform students of the requirements (and benefits) of attending scheduled degree courses and details the college's expectations and requirements for all students attending degree courses and procedures for informing instructors of absences.

Wake Tech expects students to attend at least 90% of all scheduled class meetings. If a student's consecutive absences from class exceed 10% of the total instructional time, the student has not communicated with the instructor and the student is currently not passing the class, then the faculty member should withdraw the student from the class.

Consistent with a culture of care, faculty have the discretion to work with students who express a need for reasonable attendance accommodation. Similarly, students must take personal responsibility for their attendance and use discretion when making schedule choices to meet the demands of work, family and other responsibilities.

- Attendance in an Online class is demonstrated by submitting at least one assignment in Blackboard during the week.
- Attendance in a Seated or Online Synchronous class is demonstrated by attending an entire class meeting at least once during the week.
- Attendance in a Hybrid or Blended class is demonstrated by submitting at least one assignment in Blackboard during the week or by attending an entire class meeting at least once during the week.

Additional expectations regarding attendance in this class may be included in Part 3 of this

syllabus.

Withdrawals (<https://www.waketech.edu/catalog/academic-information#sec8945>)

When students cannot meet the expectations of the college's attendance policy, they have a right and responsibility to withdraw themselves from class through the 80% point in the term.

Evaluation

Students sometimes have questions regarding evaluation of their work. Instructors hold regular office hours to assist students with questions about the course or evaluation of submitted work.

Academic Integrity

As noted in Part I of this syllabus, students in this course are expected to be familiar with Wake Tech's policies and procedures as well as the course requirements set by the instructor. It is important to review all updated policies in the college catalog. You are responsible for being aware of [Wake Tech's academic integrity policy](#) (opens in new window) URL: <https://www.waketech.edu/catalog/student-code-conduct-rights-and-responsibilities>, plain text link: <https://www.waketech.edu/catalog/student-code-conduct-rights-and-responsibilities>. To avoid violating this policy, please seek guidance from your instructor if you have questions.

Social Sciences Resource Center (SSRC) and Social Sciences Club

The purpose of the Social Science Resource Center (SSRC) is to provide students with a designated space to study, engage, connect, and collaborate with faculty and other students. The SSRC also serves the needs of students who have questions about assignments or wish to receive career and curricular information. The SSRC is located in SB 250 on the Southern Wake Campus, NH 237 on the Northern Wake Campus, and has online appointments available in Teams as well as specific walk-in hours. The [SSRC hours \(opens in a new window\)](#) are posted online at <https://www.waketech.edu/about-wake-tech/divisions/art-humanities-and-social-sciences/departments/social-sciences/resource-center>.

Social Sciences Club

Students interested in the Social Sciences Club should contact faculty advisors Dr. Lisa McManus (lmcmanus@waketech.edu) or Jess McDonald (jlmacdona1@waketech.edu) regarding participation and upcoming events.

Student Concerns

Students should always work first with course instructors to find answers to questions or resolve issues with evaluation prior to contacting the Department Head or Associate Department Head.

For a student complaint or grievance, Liberal Arts Division instructors follow the guidelines in the Wake Tech College Catalog:

- The first step for resolving the situation is generally for the student to communicate concerns or complaints with the instructor, outside of class time.
- As a follow up step, the student may contact the Department Head.
- If the matter remains unresolved, the student could contact the Dean of the Liberal Arts Division. Students would need to be prepared to explain to the Liberal Arts Dean the specific concern or disagreement with the decisions of the course instructor and Department Head.

Grade Appeals (<https://www.waketech.edu/catalog/academic-information#sec8945>)

Wake Tech students have the right to request a review of how their final grades are calculated and even appeal final grades if they think the grade has been affected by factors outside of their academic performance.

This policy provides students with a fair process to voice their concerns about a final course grade and applies to students in any degree or non-degree course offered at Wake Technical Community College.

Students may appeal a final grade if they believe that it has been assigned inappropriately for one of the following reasons:

- Mathematical error in grade calculation
- Grading standards different from those published on the syllabus
- Grading standards applied inequitably

- Documented medical emergency
- Lack of clarity of deadlines
- Other extenuating circumstances (Students should consider contacting the Ombuds Office for a sounding board.)

Students should attempt to resolve concerns with their instructor as soon as possible (keeping in mind the 90-day deadline referenced below) and regardless of previous resolution attempts prior to the final course grade being posted. Students should contact their instructor with a clear message, such as, "I would like to request a meeting with you to discuss my final course grade." Students must communicate with the instructor first for the grade appeal process to go forward.

If students are unable to resolve their concerns with the instructor, they may submit a [Final Course Grade Appeal Request form](#). Students must submit this form within 90 days of the last day of the course in which the grade was awarded. Final grades cannot be appealed beyond this period.
